- The MHS series of universal transformers is designed and built to meet U.S. and International Safety Standards
- These transformers are available in both PC and Chassis-mount construction
- Power ratings of 2.5VA to 56VA, these transformers are built on dual-bobbins with insulating shrouds to provide 4000VRMS isolation between primary and secondary
- Special construction reduces primary to secondary capacitance
- 115V Single or 115/230V 50/60Hz Dual Primary

Low Profile Power Transformers

- MPL : UL Approved: Temp Class A
- Primary 115/230V 50/60Hz input, single secondary or dual isolated output for DC supplies (2.5, 6 and 12VA)
- Split bobbin for low leakage application, 1500V hi-pot
- Low capacity coupling minimizes line noise and false triggering
